

APPLICATIONS

OTHER ENGINE PARTS, OTHER STRUCTURE PARTS

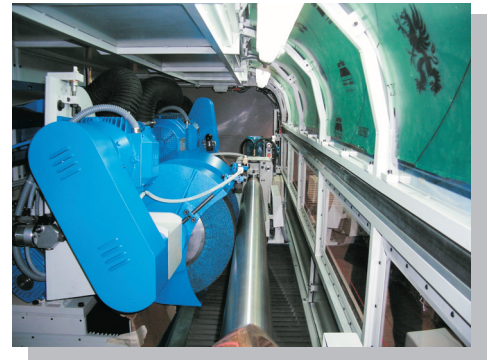

CA-200x4000/3UP

Micro finishing of hydraulic cylinders for public work machines, mining, lift-trucks, loading shovels, tractors, cranes for trucks, dump trucks, elevators, undercarriage, landing gear...

TECHNICAL CHARACTERISTICS

- Machine with tailstock for the super finishing of big sized cylinders.
- Thanks to the soft AUTOPULIT has developed, the machine sets-up automatically for reference change.
- Possibility of different belt grinding and polishing processes.
- High precision control of the working pressure compensating geometrical differences to obtain a total consistency of the final roughness.
