Advanced & Digital Manufacturing Technologies

ABOUT AFM CLUSTER

AFM CLUSTER is the organization that represents Advanced and Digital Manufacturing in Spain. Consisting of seven industrial associations, it groups together more than 800 companies that employ more than 20,000 people and account for over 5,000 million euros in revenue. From its headquarters in San Sebastián and its offices in Tianjin (China), AFM CLUSTER works to promote the internationalisation, industrial development, strategic positioning and staff training of its associate companies. The six interrelated and synergistic sectors served by AFM CLUSTER are as follows: machine tools and advanced manufacturing technologies (AFM and AIMHE);

additive manufacturing and 3D printing (ADDIMAT); han tools, hardware and industrial supply (ESKUIN); contract manufacturing and mechanical engineering (AFMEC); technology-based companies and startups for advanced manufacturing (STECH). AFM Cluster also has more than 100 partners that offer services for the manufacturing industry.

15 Spanish companies will present their advanced manufacturing innovations in the 17th BLECHEXPO exhibition. If you want to find more about the latest in advanced manufacturing, come and visit us.

Do you want to receive the latest news on advanced manufacturing in Spain?
